EXFU

Focus on repairing skin problems

Clear effect, strong pertinence.

+ Remove red blood streaks

+ Tira anti-aging

+ Light grain

+ Skin rejuvenation

2 980 1 nm RF Microneedling

1.980 nm RF Microneedling is a non-invasive skin treatment that uses radiofrequency energy to stimulate collagen production. The treatment is performed using a device with a needle that creates micro-channels in the skin, through which the radiofrequency energy is delivered. The treatment is suitable for all skin types and is effective for improving skin texture, reducing wrinkles, and promoting overall skin health. The treatment is performed in a series of sessions, with a recommended interval of 4-6 weeks between sessions. The results are visible immediately after the treatment and continue to improve over time.

2. RF Microneedling (RF Microneedling) is a non-invasive skin treatment that uses radiofrequency energy to stimulate collagen production. The treatment is performed using a device with a needle that creates micro-channels in the skin, through which the radiofrequency energy is delivered. The treatment is suitable for all skin types and is effective for improving skin texture, reducing wrinkles, and promoting overall skin health. The treatment is performed in a series of sessions, with a recommended interval of 4-6 weeks between sessions. Handle details

Exfu RF Microneedling 是結合了 RF 電能與微針技術的先進美容儀器。它透過微針在皮膚上製造微小傷口，同時釋放 RF 電能，刺激皮膚的修復過程，促進膠原蛋白的生成。這不僅能改善皮膚的質地，還能有效減少皺紋和毛孔，使皮膚更加緊緻和光滑。Exfu RF Microneedling 適合各種膚質，且操作簡單，是現代美容院的熱門選擇。

WORKING PRINCIPLE

Make Your Beauty Business Easier

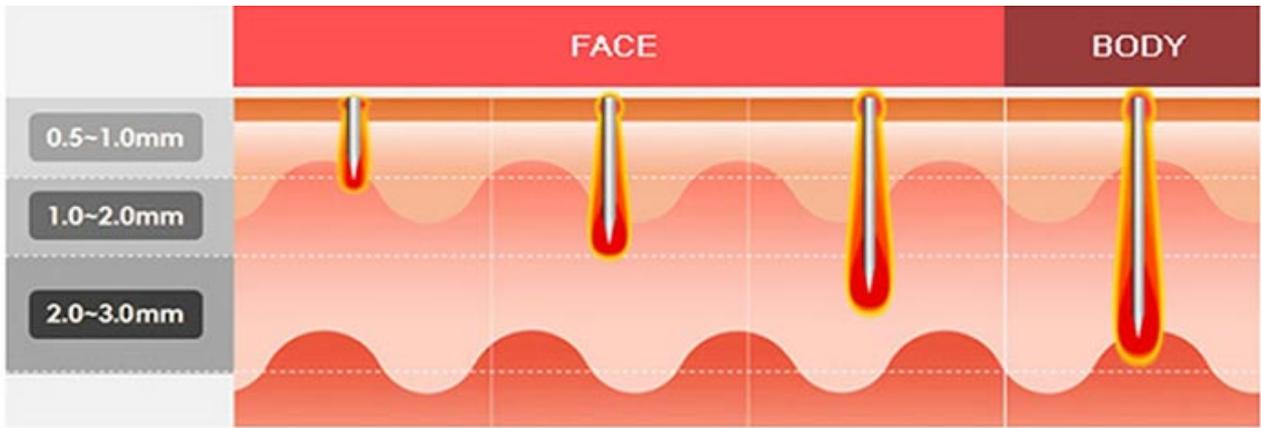

Microneedle delivers thermal energy to the treatment area more safely and effectively allowing treatment regardless of skin type. The laser energy is mostly absorbed by melanin, especially in darker skin which contains a higher melanin content.

For Micro Needle Microneedle treatments, Effective, direct thermal stimulation to remodel collagen with less epidermis damage. Micro Microneedle penetrates target area from epidermis to dermis without energy loss; stimulates and efficiently remodels disordered collagen.

Micro Needle Microneedle treatments are effective, direct thermal stimulation to remodel collagen with less epidermis damage. Micro Microneedle penetrates target area from epidermis to dermis without energy loss; stimulates and efficiently remodels disordered collagen. (RF) Micro Needle Microneedle treatments are effective, direct thermal stimulation to remodel collagen with less epidermis damage. Micro Microneedle penetrates target area from epidermis to dermis without energy loss; stimulates and efficiently remodels disordered collagen.

Control the treatment depth from 0.5-3mm by screen

• **Laser power 15w**

Our 980 machine adopts 15w low power, adjustable power and 30w application in medical devices.

• **Adjustable light spot**

Adjusting ring with four adjusting light spots, the thicker the adjusting ring, the larger the light spot, and the thinner the adjusting ring, the smaller the light spot.

• **Life 10,000 hours**

The service life is up to 10,000 hours, which can be used for 24 hours continuously.

• **No trauma**

Max directional conduction patent technology is adopted to act on the capillary in a targeted manner, breaking up hemoglobin in the capillary in an instant, shrinking and solidifying the expanded capillary in an instant, and the red blood filaments disappear.

• **Two therapeutic heads**

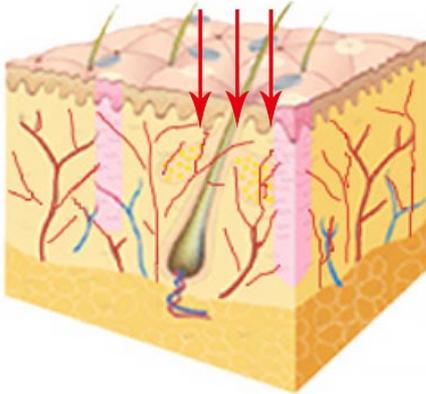

The two treatment heads are respectively used for treating red blood silk and onychomycosis.
