MF2.0MM

Unique ultra-thin probe Clexis patented technology

"Special cartridge for eyes treatment"

MF2.0MM is a non-invasive skin treatment device that uses a unique ultra-thin probe (Clexis patented technology) to deliver energy to the skin. The device is designed for eye treatment, providing a special cartridge for this purpose. The energy is delivered in a controlled manner, with parameters such as Energy (J), Distance (mm), Length (mm), and Count. The device is used to stimulate collagen production and improve skin texture, resulting in a smoother and more youthful appearance. The treatment is safe and effective, with minimal downtime. The device is also suitable for use on the face, neck, and décolletage. The energy is delivered in a controlled manner, with parameters such as Energy (J), Distance (mm), Length (mm), and Count. The device is used to stimulate collagen production and improve skin texture, resulting in a smoother and more youthful appearance. The treatment is safe and effective, with minimal downtime.
