

MF2.0MM

Unique ultra-thin probe Clexis patented technology

"Special cartridge for eyes treatment"

MF2.0MM is a non-invasive skin treatment device that uses a unique ultra-thin probe technology. It is designed for the treatment of various skin conditions, including wrinkles, fine lines, and skin laxity. The device uses a special cartridge for eye treatment, which is designed to be safe and effective for the delicate skin around the eyes. The treatment is performed by applying the probe to the skin and emitting a beam of energy that stimulates the production of collagen and elastin, resulting in tighter, smoother skin. The treatment is painless and does not require any downtime. MF2.0MM is a safe and effective treatment for various skin conditions, and it is suitable for all skin types. The device is easy to use and can be performed by a trained professional or a licensed esthetician. The treatment is a great option for anyone looking to improve their skin's appearance and reduce the signs of aging.

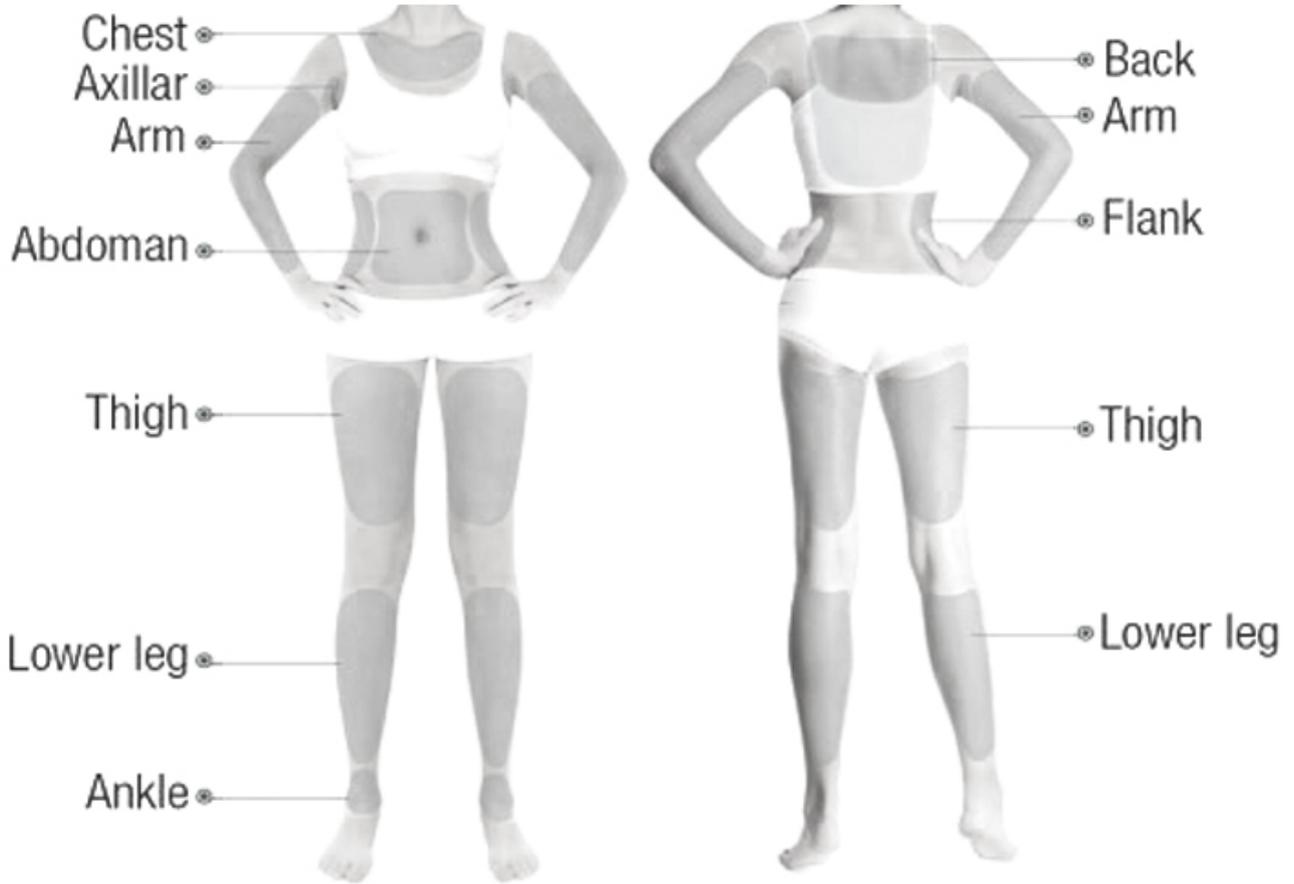

Macro & Micro High Intensity Focused Ultrasound System

7 CARTRIDGES + 4 GUN HEADS

1.5mm, 2.0mm, 3.0mm, 4.5mm for face treatment
6.0mm, 9mm, 13mm for body treatment.
