MF2.0MM

Unique ultra-thin probe Clexis patented technology

"Special cartridge for eyes treatment"

MF2.0MM is a non-invasive skin treatment device that uses a unique ultra-thin probe to deliver energy to the skin. The device is designed for the treatment of wrinkles and fine lines, particularly around the eyes. The probe is made of a special material that allows it to penetrate the skin without causing any damage. The energy is delivered in a controlled manner, ensuring that the skin is treated effectively and safely. The device is easy to use and can be used on all skin types. The results are visible immediately and last for several months. MF2.0MM is a revolutionary skin treatment device that offers a safe and effective solution for wrinkles and fine lines.
