How is it different?

5. EXFU is a medical laser device that is used for various skin treatments.

1. 532: This is a wavelength that is used for treating various skin conditions.

2. . This is a wavelength that is used for treating various skin conditions. The device has a wavelength of 755 nm, which is used for treating various skin conditions.

3. This is a wavelength that is used for treating various skin conditions. The device has a wavelength of 1064 nm, which is used for treating various skin conditions.

4. This is a wavelength that is used for treating various skin conditions. The device has a wavelength of 1064 nm, which is used for treating various skin conditions.

5. 1320: This is a wavelength that is used for treating various skin conditions. The device has a wavelength of 1320 nm, which is used for treating various skin conditions.

Advantage

The maximum energy, the best effect

Laboratory data shows that the laser rod reaches 2000mj.
Precise calculation of laser value
The aiming distance of the indicator light is 6-10cm

5 treatment heads

Detachable and rotatable outer wire design

532: Remove colored tattoos.

755:honeycomb head: used to remove age spots, freckles, and chloasma. little damage to skin

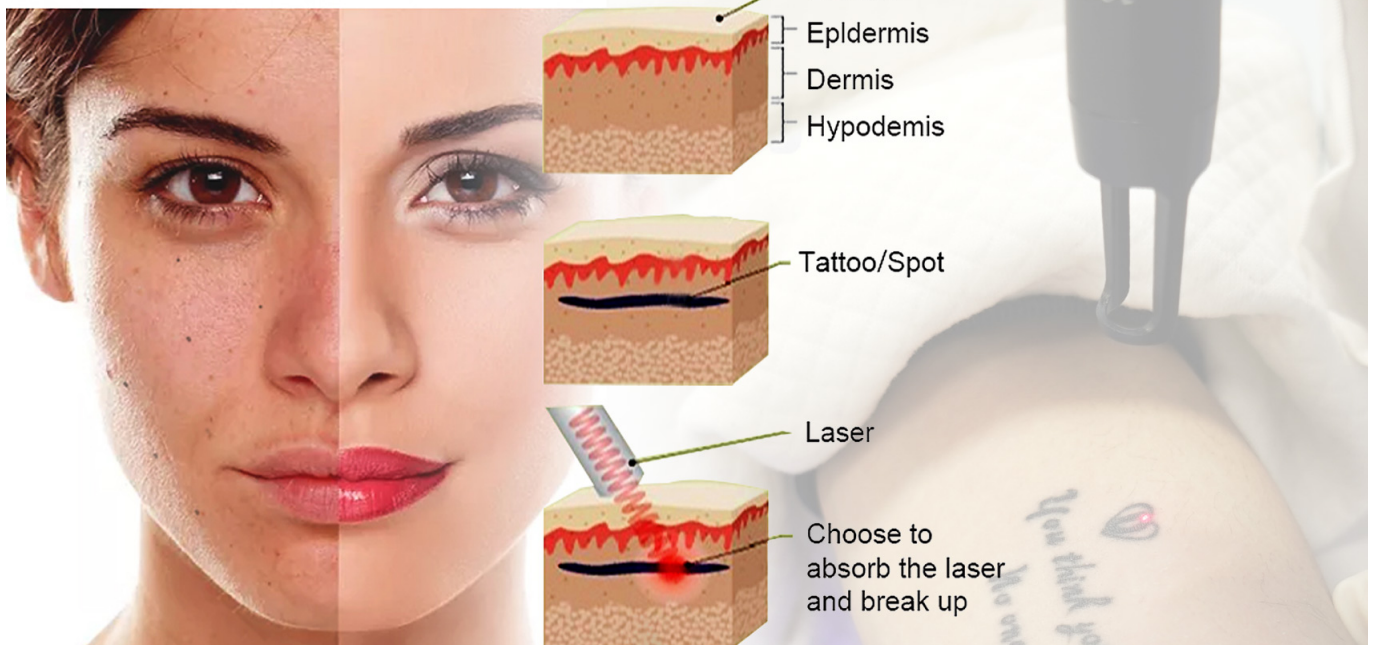

Adjustable parameter 1064: for tattoo removal, eyebrow clearing

1064: used for removing tattoos and clearing eyebrows

1320: large area treatment, large spot, fast treatment speed and good effect
