RF (Radio Frequency)

RF is a type of energy used in medical devices.

RF is used in various medical devices, including RF ablation catheters, RF generators, and RF energy delivery systems.

RF energy is used to treat various conditions, including arrhythmias, heart failure, and cancer.

RF energy is used to create lesions in the heart tissue, which can help to treat arrhythmias and heart failure.

RF energy is also used in RF ablation catheters to treat arrhythmias. RF energy is used to create lesions in the heart tissue, which can help to treat arrhythmias.
