MF2.0MM

Unique ultra-thin probe Clexis patented technology

"Special cartridge for eyes treatment"

0.5-0.5mm probe technology. This technology is used for the treatment of the skin, specifically for the treatment of the eyes. The probe is used to deliver energy to the skin, which stimulates the production of collagen and elastin. This results in a tightening and lifting of the skin, reducing the appearance of wrinkles and sagging. The treatment is non-invasive and has no downtime.

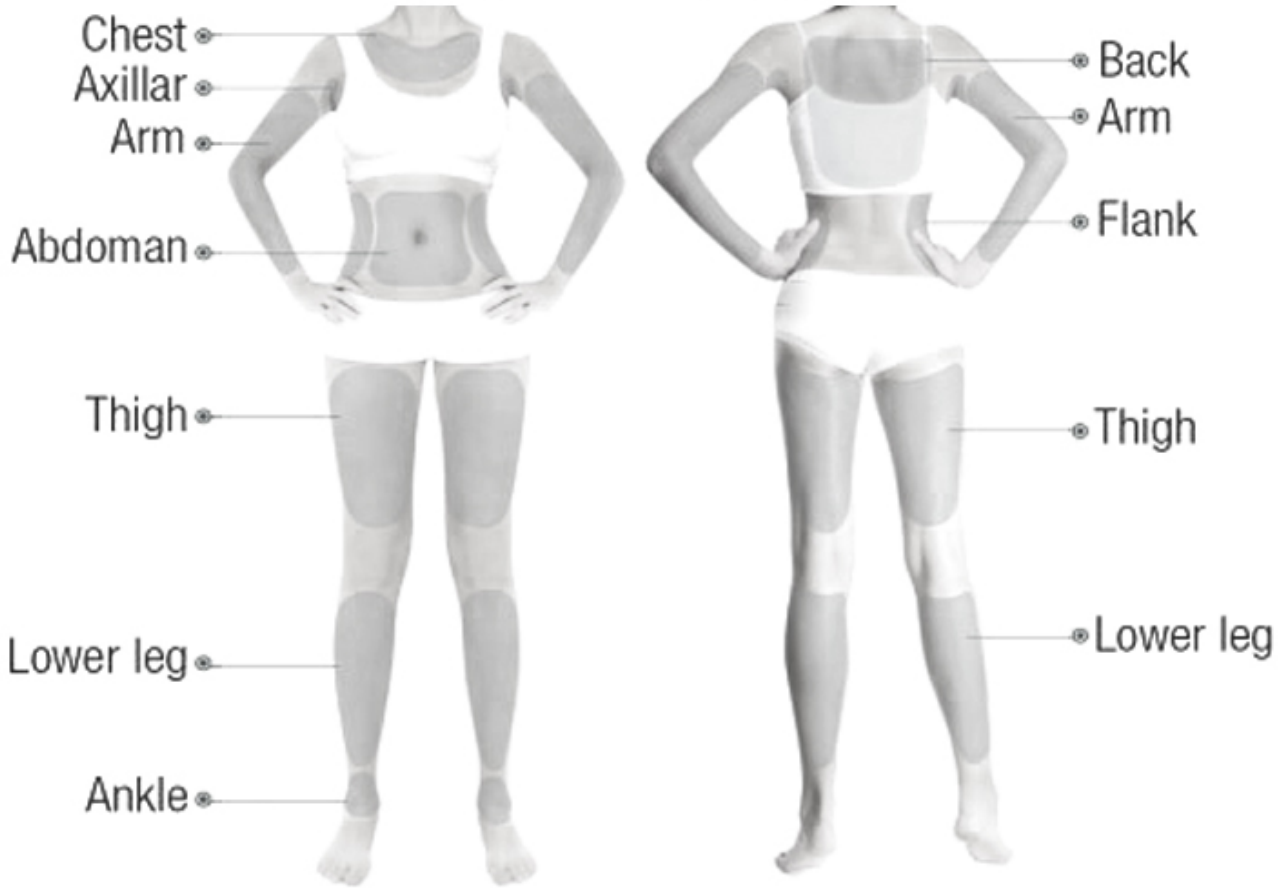

Macro & Micro High Intensity Focused Ultrasound System

7 CARTRIDGES + 4 GUN HEADS

1.5mm, 2.0mm, 3.0mm, 4.5mm for face treatment
6.0mm, 9mm, 13mm for body treatment.
