Our

VS

Other

The screen of the handle does not freeze, and the capacitive screen system is operated by sliding

350g, smaller and lighter, more convenient for treatment

Customizable single band cooling for one minute, no need to wait during treatment, continuous cooling improves efficiency by 50%

Handle cooling piece×3,It can truly cool down in one minute and work 24 hours a day.

Customer feelings:Good,The treatment has a micro-needle feel and is relatively comfortable.

Treatment without waiting

Controller screen freezes, single-point operation

The industrial handle is large and heavy, which makes the healer tired

The replacement head is easy to get dust and burn out, cooling is slow, and you need to wait during the treatment process.

There is only one handle cooling piece, which takes a long time to cool down. You need to wait for the handle to re-cool during the treatment process.

Customer feelings:Poor,The treatment felt like micro-needle, and there was obvious heat pain I couldn't tolerate it after 20 seconds, so I stopped and started again.

Need to cool again during treatment

我们采用先进的冷却技术，采用Dual-TEC冷却系统，可实现连续冷却，无需等待，治疗过程中无需再次冷却。治疗时间24小时，治疗过程中无需等待。
