Make Your Beauty Business Easier

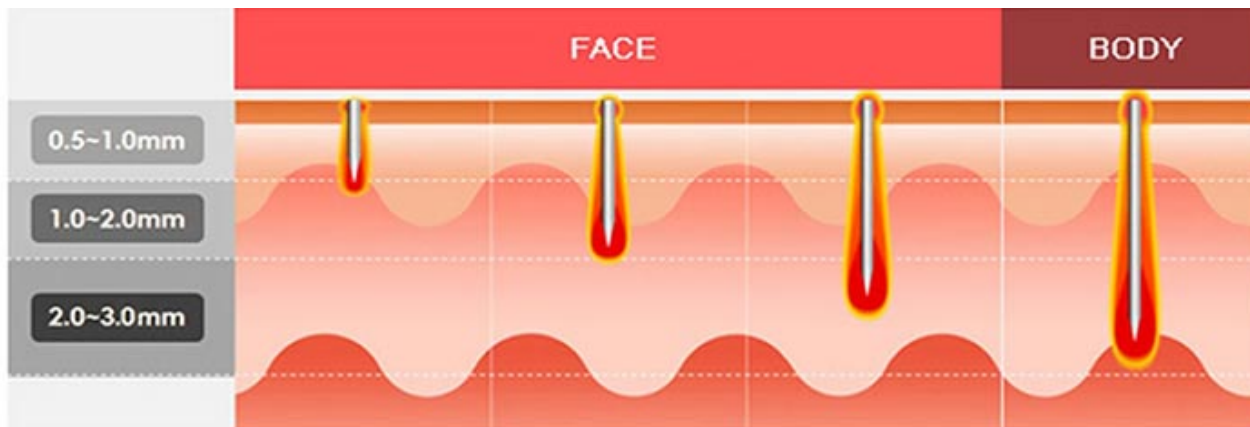

Microneedle delivers thermal energy to the treatment area more safely and effectively allowing treatment regardless of skin type. The laser energy is mostly absorbed by melanin, especially in darker skin which contains a higher melanin content.

For Micro Needle Microneedle treatments, Effective, direct thermal stimulation to remodel collagen with less epidermis damage. Micro Microneedle penetrates target area from epidermis to dermis without energy loss; stimulates and efficiently remodels disordered collagen.

CHANGE 

Our 980 machine adopts 15w low power, adjustable power and 30w application in medical devices.

The service life is up to 10,000 hours, which can be used for 24 hours continuously.

Adjusting ring with four adjusting light spots, the thicker the adjusting ring, the larger the light spot, and the thinner the adjusting ring, the smaller the light spot.

Max directional conduction patent technology is adopted to act on the capillary in a targeted manner, breaking up hemoglobin in the capillary in an instant, shrinking and solidifying the expanded capillary in an instant, and the red blood filaments disappear.

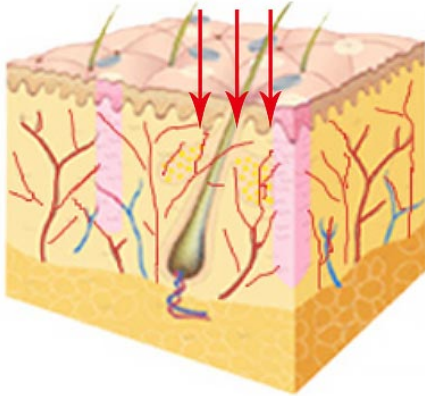

The two treatment heads are respectively used for treating red blood silk and onychomycosis.
