# MF2.0MM

Unique ultra-thin probe Clexis patented technology

"Special cartridge for eyes treatment"

MF2.0MM is a non-invasive skin treatment device that uses a unique ultra-thin probe. The probe is applied to the skin surface, and energy is delivered to the underlying tissue. This process stimulates collagen production and improves skin texture. The device is specifically designed for eye treatment, providing a safe and effective way to reduce wrinkles and fine lines around the eyes. The energy levels are adjustable, ranging from 0 to 0.5 Joules, allowing for personalized treatment. The device also features a special cartridge for eye treatment, ensuring precision and safety. The overall effect is a smoother, more youthful-looking complexion.

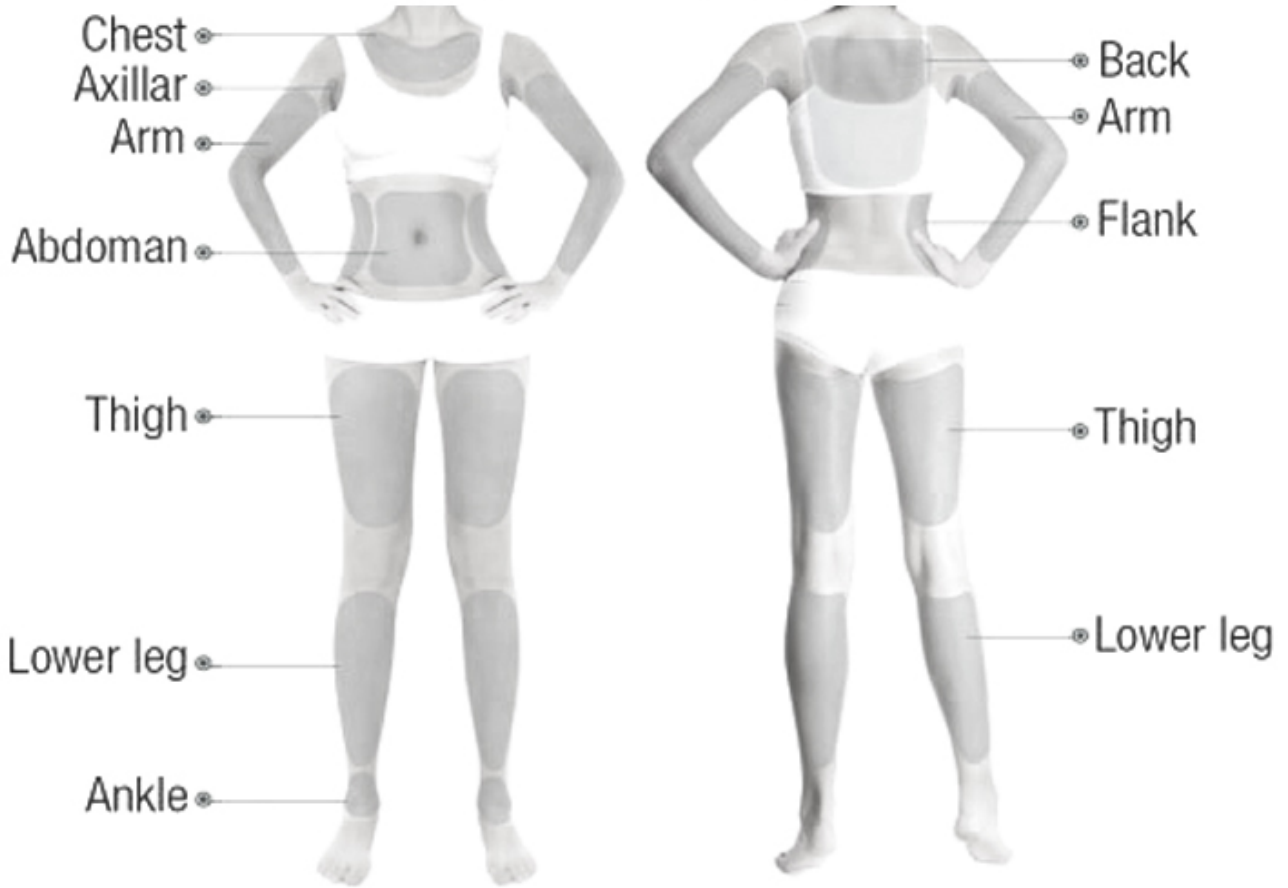

**Macro & Micro High Intensity Focused Ultrasound System**

**7 CARTRIDGES + 4 GUN HEADS**

1.5mm, 2.0mm, 3.0mm, 4.5mm for face treatment  
6.0mm, 9mm, 13mm for body treatment.
