High nd yag laser technology, international standard of production, technical test strictly. Imported stone Q-switch cassette mechanism, the entire solid laser, without replacing Q-switch.

ND YAG ADVANTAGE

Imported crystal bonding laser rod, best quality, shot more than 1.5 million times
Counter on the handle, more easy to get the total shot time
LED red indicator, more easy to aim on the treatment area.
5 treatment tips for multi fuctions: tattoo removal, skin rejuvenation, pigment removal, carbon peeling....

The diagram illustrates the laser's mechanism of action on skin layers. A laser beam is shown hitting a tattoo (ink) in the dermis. The ink is broken down by the laser energy. The broken-down pigment is then absorbed by phagocytes (immune cells) and transported through a lymphatic channel. The skin layers shown are the Epidermis, Dermis, Hypodermis, and Muscle.

Tattoo removal □ nevus of Ota removal □ eyebrow removal lipline removal □ pigment removal □ nevus removal □ birth mark removal □ skin rejuvenation and skin whitening
