

DIODE LASER

ICELLO

MLKJ is the best commercial laser hair removal machine.

According to the principle of selective photothermodynamics, the wavelength, energy and pulse width of the laser can be properly adjusted so that the laser passes from the skin surface to the root hair follicle. The light energy is absorbed and converted into heat energy that destroys the hair follicle tissue, making the hair unable to regenerate, making MLKJ lasers painless and permanent with patented technology. The laser hair removal machine is a non-invasive treatment method, after the treatment it will not cause any special damage to the surrounding skin, it will not affect the normal life and work.

□ FDA and medical CE certified device

□ 3 in 1 - three laser technologies in one device

□ Alexandrite, diode and Nd:YAG lasers - treat all types of skin

□ Easy operation

□ Online training is available

□ 50 million shots per handpiece!
