Hair removal principle

Make Your Beauty Business More Easier

The laser selectively acts on the melanin in the hair follicle, destroying the hair-growing area

Natural hair loss, prevent regeneration, and achieve the purpose of hair removal

Hair removal also stimulates collagen regeneration, shrinks pores and makes skin firm and smooth

The laser contains four wavelengths output, has a wide range of applicability. It has a certain therapeutic effect on removing red blood streaks, varicose veins, anti-inflammatory, hair removal, whitening, and skin rejuvenation.
