

Product Description

How does this machine work?

It adopts high intensity pulsed electromagnetic to build muscle and tones for the abdomen, arms, legs, and buttocks.

Muscle Building

The Intensive supramaximal contractions stimulate the react of the muscles. The energy reconstructs internal structure, causing the regrowth of muscle cells, the creation of protein, and muscle fiber chains. This procedure leads the results in higher density and muscle volume.

**Fat Removal**

The muscle-building improve the epinephrine release, which brings an obvious effect that leads to supramaximal lipolysis in fat cells.

Circulation of lymphatic improvement

The electromagnetic waves stimulate the hemoglobin, increases blood flow, lymphatic circulation. The procedure increases that dead fat cells are eliminated naturally. COMPETITIVENESS

High Intensity

TeslaSculpt based on high-intensity magnetic energy, which could cover big skeletal muscles of the human body, and this highenergy level allows muscle response with a deep remodeling of its inner structure.

Work principle

Treatment demonstration

Before and After

Abdominal weight loss

Arm weight loss

Leg weight loss

Leg weight loss

High Intensity

TeslaSculpt based on high-intensity magnetic energy, which could cover big skeletal muscles of the human body, and this high energy level allows muscle response with a deep remodeling of its inner structure.

Stronger Stimulation

Double layer Coil generates deeper and stronger high-intensity electromagnetic effects.

Liquid Cooling Technology

TeslaSculpt equipped with liquid-cooled applicators that allow long time operation without any overheating issue.

Double Sculpting

Two Magnetic Stimulation Applicators to treat all of your concerns independently or simultaneously.

BUILD MUSCLE

The muscle contracts 30000 times with high frequency and intensity, so as to train and increase muscle density and volume

REDUCE FAT

The ultimate

contraction of muscle needs a large amount of energy supply, so the fat cells beside the muscle are also consumed, leading to natural apoptosis and effective reduction of fat thickness

Muscle Sculpt

Exercising the abdominal muscles, shaping the vest line / exercising the hip muscles, creating the peach hips / exercising the abdominal oblique muscles, and shaping the mermaid line.
