

Co2 fractional laser vaginal tightening

You change that surprised them

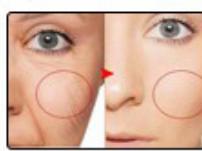

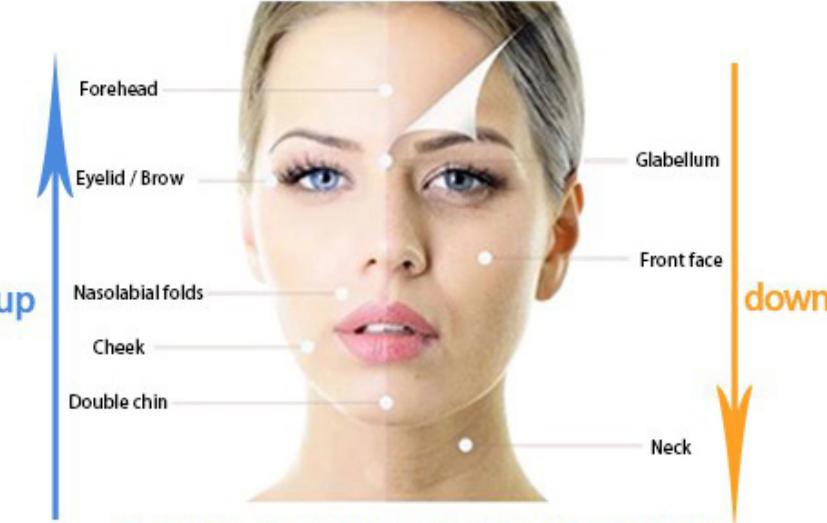

Collagen contraction
and remolding

Pigmentation removal

Skin tightening

SKIN RECONSTRUCTION

Vaginal tightetning

Scar removal

Stretch mark removal

Five therapeutic heads

Equipped with scanning head * 1 / cutting head * 1 / private head * 3

- **Scanning head efficacy**

Tender skin/shrink pores/remove striae gravidarum and chloasma

- **Cutting head efficacy**

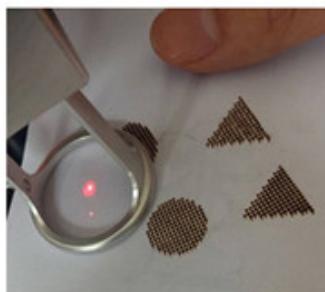

Removing sarcoma / nevus

- **Efficacy of private head**

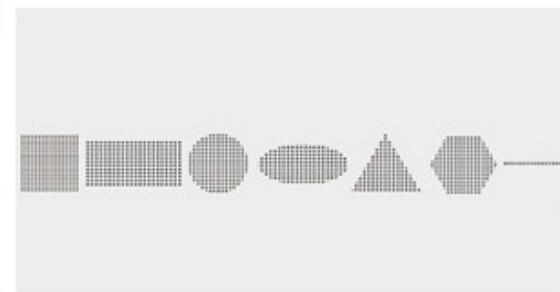

Tighten vagina / tender vulva / tender vulva

• Trachea

Adjustable dot shape
and size Shape display

informação do produto

Função da máquina a laser fracionário de CO2:

1. Cirurgia de recapeamento a laser
 2. Cirurgia de remoção de rugas a laser
 3. Cirurgia de remoção de cicatriz a laser
 4. Blefaroplastia a laser
5. Outras aplicações: Remoção de nevos com pimentão, cloasmas, sardas, pigmentos da idade, verrugas, ceratose seborreica, siringoma, acnes, milia, estrias gravídicas; Redução de poros; Endurecimento da pele; Transplante capilar a laser; Aumento de mama a laser e etc.

CO₂ FRACTIONAL LASER CLEARLY DIFFERENT

BENEFITS

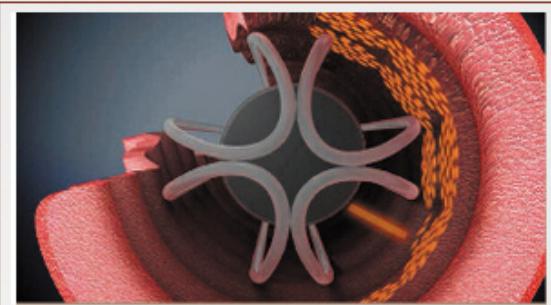

- Shortest Pulse Duration,
Enabling High Peak Power
- Unique Double Pulse Mode
- Supreme Feature-Set
- Improved ROI with Excellent Results in
Fewer Treatments
- Versatile Platform Enabling Multiple
Patient-Tailored Treatment Options
- Suitable for All Skin Types

Work Theory

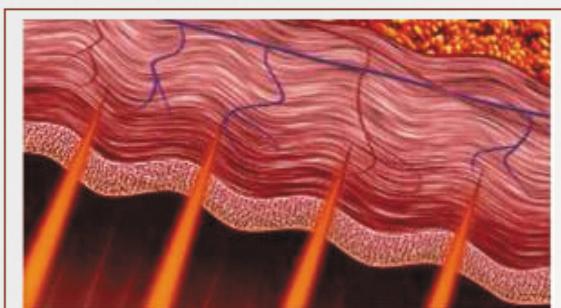

It concentrated trearmal heating of the vaginal tissue inner layers induces collagen and elastine contraction and regeneration of these proteins in the longer term. These molecular signal activate the entire wound healing process of the body's local immune system. The treatment outcome is the complete remodeling of the vaginal tissue in addition to re-establishment of firm "young like" vaginal tissue embedded with string-like, thick and long collagen fibers.

1. Laser irradiation angle can be adjusted

2. Laser irradiation can be rotated 360 degrees

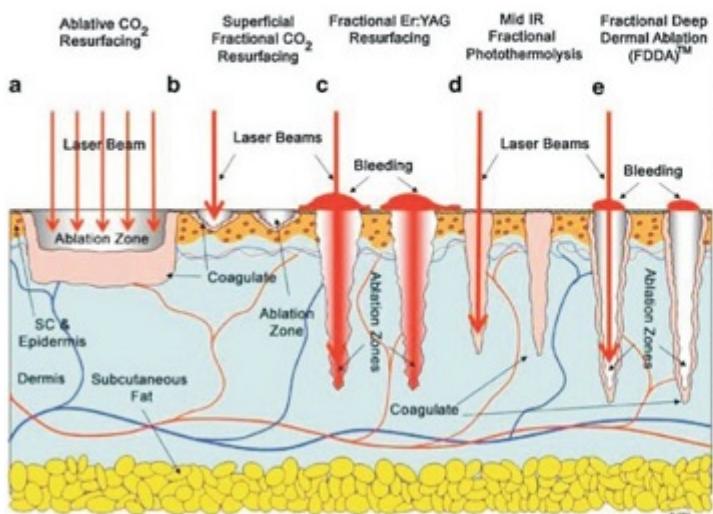

3. The area of the laser is compact edge contraction

4. vaginal walls shrink and tightening

WORKING PRINCIPLE

The co₂ laser uses a unique head piece which tracks the CO₂ 10.6 μm wavelength light as it passes light through its optical lens to penetrate the skin. We can control the depth of the penetration from only a few micrometers in depth (only as deep as a few sheets of paper) to much deeper with tiny thermal channels. This will also determine the length of healing, the number of treatments and the cost. Each thermal channel creates a small micro-injury but does not significantly disturb or disrupt the surrounding tissue.

Treatment effect comparison

Tela de exibição

Tela de toque verdadeira de 10,4 polegadas, tipo de pele de 6 tipos para escolha. * Tela de toque grande em cores reais de 10,4 polegadas

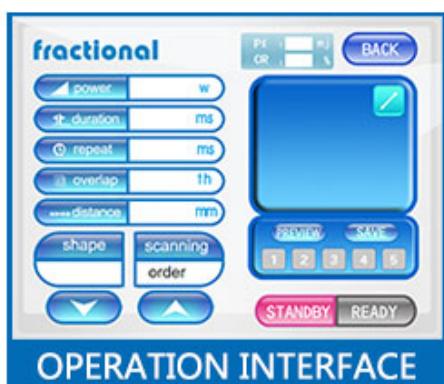

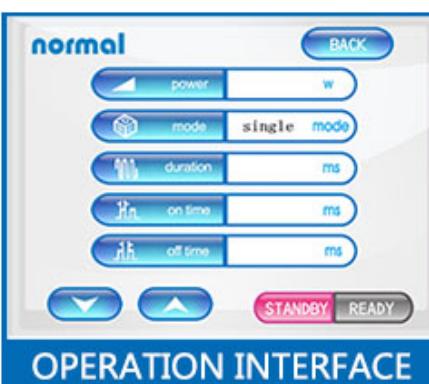

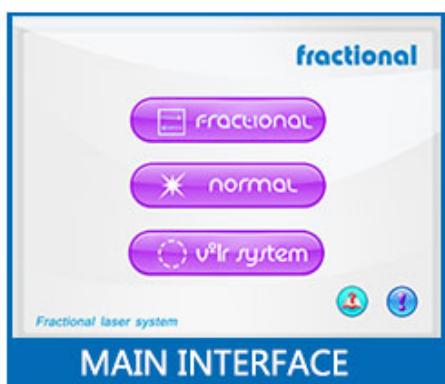

* Experiência de toque super legal

* 6 idiomas para sua escolha, um idioma especial pode ser adicionado

* O serviço OEM é aceito, como ajuste de parâmetro, inclui energia / frequência / largura de pulso

* 12 tipos de padrões de saída

SCREEN IMAGE

Tipo de laser

Comprimento de onda do laser

Potência do laser

Sistema de luz

Laser Fracionário de Dióxido de Carbono

1060nm

até 40W (opcional)

7 braços articulados

Duração do pulso	100-5000us
Facula	modo único
Diâmetro focalizado da viga	0,25 mm
Área focal	0,05 mm ²
Formulário de saída	Ultra Pulse, fracionário
Modo de trabalho	Carregamento intermitente
Modo de digitalização	Sequência, aleatória, paralela (comutável)
Scanning Shapes	Triângulo / quadrado / retângulo / redondo / oval / hexágono / linear
Área do diagrama	≤20mm * 20mm
Interface de tela de toque colorida	10,4 polegadas
Sistema de refrigeração	Refrigeração a ar, refrigeração a água
Potência de entrada	AC 230V ± 10%, 50HZ / AC 110V ± 10% 60HZ
Tamanho do ponto	≥0,2mm no foco
Tempo de radiação / tempo de intervalo	0,01 1 s
Mira de mira	Raio infravermelho de 635nm
Fonte de energia	110 / 220V 10% 60HZ 6A
